PROFESSIONAL SUMMARY

Results-driven Software Engineer with expertise in modern web development and e-commerce systems, backed by a strong understanding of e-commerce operations and data-driven performance optimization. Skilled in HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB, with experience building responsive, scalable applications. Proficient in leveraging Generative AI (Gemini, Claude) to accelerate development, automate workflows, and deliver intelligent solutions. Experienced in Oracle APEX for developing efficient, database-driven applications tailored for startups and business growth.

WORK EXPERIENCE

Freelance IT & Web Developer | Jan 2022 – Jan 2024 | Amman, Jordan

- Developed and deployed responsive web applications using HTML, CSS, and JavaScript, focusing on performance and user experience.
- Used AI tools (Claude, Gemini) to assist in coding, debugging, and generating development ideas, improving workflow speed.
- Enhanced UI/UX through iterative, data-driven improvements, increasing usability and user engagement.
- Integrated web applications with e-commerce workflows to support online business operations and scalability.

E-commerce Projects | Jan 2022 – Feb 2025 | Amman, Jordan

- Managed end-to-end e-commerce operations on Amazon and Alibaba platforms, including product listings and store management.
- Optimized product listings using SEO strategies and AI tools, improving visibility and conversion rates.
- Created high-quality product descriptions and marketing content using AI tools to enhance customer engagement.
- Monitored sales performance and continuously refined listings and strategies based on data insights.
- Analyzed marketplace data to identify opportunities for improving sales and operational efficiency.

EDUCATION

Bachelor's Degree in Software Engineering | 2020 – 2024
Applied Science Private University – Amman, Jordan

SKILLS

Technical Skills

- Frontend Development: HTML | CSS | JavaScript | Responsive Web Design.
- Backend Development: Node.js | Express.js | REST APIs.
- Database Systems: MongoDB | SQL | Database Design & Management.
- Low-Code Development: Oracle APEX (Database-driven applications).
- E-commerce Systems: Online store development, marketplace operations & optimization (Amazon, Alibaba).
- AI & Automation: Generative AI tools (Gemini, Claude) for coding support, workflow automation, and productivity enhancement.

Soft Skills

- Analytical Thinking | Problem Solving | Communication & Teamwork | Project Management | Client & Business Understanding

PROJECT

AnasAura Anime Store (Personal E-commerce Project)

- Built a responsive anime e-commerce website using HTML, CSS, and JavaScript with a focus on performance and mobile responsiveness
- Designed a modern anime-themed UI/UX (red & black branding) to enhance visual engagement and user experience
- Structured the platform around real e-commerce workflow including product showcasing and customer interaction flow
- Integrated WhatsApp-based ordering system to enable direct communication and simplify the purchasing process
- Leveraged AI tools (Claude, Gemini) to support UI ideas, content generation, and development acceleration
- Applied e-commerce knowledge to simulate product presentation, customer journey, and basic sales optimization concepts
- Built the project as a scalable concept targeting online anime product sales in the Gulf market

Professional Training:

Oracle APEX Development Training – Completed comprehensive course through Oracle learning platform Oracle MyLearn, covering application development, database integration, and low-code web applications.
